

Separable Differential Equations

1. Solve the following separable differential equations.

(A) $y' = \frac{x}{y}$

(B) $y' = \frac{x^2}{y^3}$

(C) $y' = xy^2$

(D) $y' = x^2y$

2. Solve the following separable initial value problems.

(A) $y' = -\frac{y}{x} \quad y(1) = 2$

(B) $y' = xy + y \quad y(0) = 3$
